- Game marketing Research
- Project Management
- SFX Design
- UI/UX Design
- Data Visualization

SOFTWARE

- Excel (Game Balancing, Reward table, progression curve, IAP modelling)
- Figma
- Photoshop
- Audacity
- Trello
- Tableau
- Miro

PROFILE

I am a game designer with 2 years of experience designing quest systems, progression-driven narratives, and puzzle-based gameplay for mobile and PC titles. Strong focus on player engagement, feature documentation, cross-team collaboration, and iterative design based on player behavior and feedback.

WORK EXPERIENCE

BooBoo Games

Nov. 2025 - Present

Game Designer

- Designed gameplay systems and complete Game Design Documents for idle-casual mobile games.
- Built and balanced in-game economies using Excel including soft currency, reward systems, RV rewards, and IAP progression.
- Designed UI elements and gameplay flows for idle mechanics and progression systems.
- Worked closely with programmers and artists to ensure accurate gameplay implementation and feature execution.

Gameink Studios

Nov. 2024 - Oct. 2025

Game Designer

- Designed gameplay features and quest-based narrative systems for multiple game projects.
- Created puzzle levels and gameplay mechanics for sci-fi and horror themed titles.
- Produced feature documentation including design specs, gameplay flows, and task breakdowns.
- Coordinated with art, programming, and sound teams to align gameplay vision with technical implementation.
- Contributed to marketing strategy and promotional content for game launches.

Sherlock Studios

June 2024 - Oct 2024

Narrative Designer

- Designed narrative-driven puzzles and gameplay sequences to support story progression.
- Collaborated with UI/UX designers and sound teams to ensure cohesive player experience.
- Balanced creative writing with gameplay flow to create immersive storytelling moments.

PROJECTS

Find The Dragon Orbs

March 2023 - August 2024

Narrative Designer | UI/UX Designer | Sound Designer

- Developed full game concept including narrative, level structure, and gameplay progression.
- Designed UI/UX flows for intuitive navigation and player interaction.
- Created and edited sound effects to enhance gameplay feedback and atmosphere.
- Produced development documentation and design logs for the project lifecycle.

EDUCATION

Game Design and Production

2022 - 2024

Gamer2Maker

Master of Business Administration

2021 - 2023

Dr Ambedkar Institute of Management Studies Research, Nagpur University
